# Contents

## Philosophy and Methodology

- Mathematics Introduction ............................................................................................................. 3
- Montessori Math ......................................................................................................................... 4
- Prior Learning .............................................................................................................................. 6
- Characteristics of Montessori Math Materials ................................................................................ 8
- Areas of Montessori Math ........................................................................................................... 12

## Number to Ten

- Numbers to Ten Introduction ........................................................................................................ 15
- About the Number Rods ............................................................................................................... 18
- Counting with the Number Rods ................................................................................................. 20
  - Extension: Playing the “Please Bring Me” Game ................................................................. 22
  - Extension: Learning to Discriminate Quantities ................................................................... 23
  - Extension: Counting the Maze ............................................................................................... 23
- About the Sandpaper Numbers ................................................................................................. 24
- Working with the Sandpaper Numbers ...................................................................................... 26
  - Extension: Playing the “Please Bring Me” Game ................................................................. 28
  - Extension: Tracing and Forming Numbers .......................................................................... 28
  - Extension: Identifying Numbers in the Environment .......................................................... 28
  - Extension: Putting the Sandpaper Numbers in Sequence .................................................. 28
  - Extension: Playing Number Games ...................................................................................... 28
- Matching Number Rods and Number Cards ........................................................................... 29
  - Extension: Matching Number Cards to Number Rods ........................................................ 30
  - Extension: Playing a Matching Game .................................................................................... 31
  - Extension: Making Combinations ......................................................................................... 31
  - Extension: Exploring Combinations ...................................................................................... 31
- About the Spindle Boxes ............................................................................................................ 32

Tens, Teens, and Hundreds

Teens, Tens, and Hundreds Introduction .......................................................................165
About the Short Bead Stair .............................................................................................168
Counting with the Short Bead Stair ...............................................................................172
  Extension: Identifying Colored Bead Bars .................................................................174
  Extension: Coloring Printed Copies of the Short Bead Stair ......................................174
  Extension: Performing a Stereognostic Exercise .......................................................175
  Extension: Matching the Short Bead Stair and Small Number Cards .........................175
  Extension: Nomenclature Cards ................................................................................175
Building Quantities 11–19 .............................................................................................176
  Extension: Identifying and Building Quantities ..........................................................178
About the Teen Boards and Tens Boards ......................................................................179
Learning Numbers 11–19 with the Teen Boards ............................................................181
  Extension: Identifying and Forming Numbers ............................................................183
Associating Quantities and Symbols for 11–19 ...............................................................184
  Extension: Matching Quantities to Numbers ..............................................................186
  Extension: Identifying and Building Numbers ...........................................................186
About the Teen Frame ....................................................................................................187
Associating Quantities and Symbols 11–19 with the Teen Frame .................................188
  Extension: Nomenclature Cards ................................................................................190
Building Quantities 10–90 .............................................................................................191
  Extension: Identifying and Building Quantities ..........................................................193
Learning Numbers 10–90 with the Tens Boards ............................................................194
  Extension: Identifying Tens .......................................................................................195
  Extension: Forming Tens with the Teen Boards .......................................................196
  Extension: Comparing Tens with the Tens and Teen Boards ....................................196
  Extension: Identifying Tens Using the Teen Boards ................................................196
Associating Quantities and Symbols for 10–90 ............................................................197
  Extension: Identifying and Building Numbers ...........................................................199
  Extension: Nomenclature Cards ................................................................................199
Building Quantities 11–99 .................................................................200
   Extension: Identifying and Building Quantities.................................202
Learning Numbers 11–99 with the Tens Boards ..................................203
   Extension: Identifying and Forming Numbers.................................205
Associating Quantities and Symbols for 11–99 .................................206
   Extension: Identifying and Building Numbers.................................208
About the Hundred Chain .................................................................209
Counting the Hundred Chain ............................................................211
   Extension: Building a Decagon with the Hundred Chain .................213
   Extension: Finding Numbers on the Hundred Chain .........................214
   Extension: Working with the Thousand Chain................................214
   Extension: Working with the Short Bead Chains .........................215
   Extension: Comparing Short Bead Chains and Squares ..................215
   Extension: Forming Shapes with the Short Bead Chains .................215
   Extension: Working with the Long Bead Chains .............................216
   Extension: Comparing Long Bead Chains, Squares, and Cubes .........216
About the Hundred Board .................................................................217
Working with the Hundred Board ......................................................218
   Extension: Printing Numbers 1–100 .................................................220
   Extension: Exploring Number Positioning with the Hundred Board ...220
Memorization
Memorization Introduction .............................................................223
About the Small Number Rods ..........................................................226
Adding with the Small Number Rods .................................................228
   Extension: Exploring the Commutative Property of Addition .........230
   Extension: Finding Sums with the Small Number Rods ..................230
   Extension: Using Math Symbols with the Small Number Rods ........231
   Extension: Recording Equations Formed with the Small Number Rods231
Adding with the Short Bead Stairs ......................................................232
   Extension: Using Math Symbols with the Short Bead Stairs ............233
   Extension: Recording Equations Formed with the Short Bead Stairs ..234
   Extension: Matching Equations with the Addition Booklet ..........234
   Extension: Exploring the Associative Property of Addition .............234
About the Snake Game .................................................................235
Playing the Addition Snake Game .................................................................238
  Extension: Demonstrating the Snake Game Control of Error .................241
  Extension: Writing the Snake Game Equations ........................................242
About the Addition Strip Board .........................................................................243
Working with the Addition Strip Board ............................................................245
  Extension: Building Combinations for One Sum ........................................248
  Extension: Exploring the Commutative Property of Addition ..................248
About the Addition Charts .............................................................................249
Working with Addition Chart 3 ......................................................................253
  Extension: Using Dice with Addition Chart 3 ..........................................255
  Extension: Exploring the Commutative Property of Addition ..................255
Working with Addition Chart 4 ......................................................................256
  Extension: Finding Doubles on Addition Chart 4 ....................................258
  Extension: Solving Other Equations with One Hand ..............................258
Working with Addition Chart 5 ......................................................................259
  Extension: Exploring Even and Odd Numbers with Addition ..................261
Working with Addition Chart 6 ......................................................................262
  Extension: Finding the Sum for Every Square .........................................264
  Extension: Recording Sums on Addition Chart 6 .....................................264
  Extension: Finding Combinations on Addition Chart 6 ............................264
  Extension: Playing Games with the Addition Charts ..............................264
Subtracting with the Small Number Rods .......................................................265
  Extension: Working with One Set of Small Number Rods .......................267
  Extension: Recording Equations Formed with the Small Number Rods ....267
Playing the Subtraction Snake Game ..............................................................268
  Extension: Demonstrating the Snake Game Control of Error ................271
  Extension: Writing the Snake Game Equations ........................................271
About the Subtraction Strip Board .................................................................272
Working with the Subtraction Strip Board .....................................................274
  Extension: Recording the Subtraction Tables ..........................................277
  Extension: Working with the Red Number Strips ....................................278
  Extension: Confirming Equations with the Subtraction Strip Board ........278
About the Subtraction Charts ......................................................................279
Working with Subtraction Chart 2 .................................................................281
  Extension: Finding Zero on Subtraction Chart 2 ....................................283
  Extension: Finding Patterns in the Differences ......................................283
Working with Subtraction Chart 3 ................................................................. 284
  Extension: Finding the Difference for Every Square ................................. 286
  Extension: Recording Differences on Subtractions Chart 3 ....................... 286
  Extension: Finding Combinations on Subtraction Chart 3 ......................... 286
  Extension: Playing Games with the Subtraction Charts ......................... 286

About the Multiplication Bead Board ............................................................. 287

Working with the Multiplication Bead Board ................................................. 290
  Extension: Recording Equations Formed on the Multiplication Bead Board ...... 292
  Extension: Using Equation Slips with the Multiplication Bead Board .............. 293
  Extension: Working with the Commutative Property of Multiplication ............ 293

Multiplying with the Colored Bead Bars .................................................... 294
  Extension: Recording Equations Formed with the Colored Bead Bars .......... 296
  Extension: Using Equation Slips with the Colored Bead Bars ...................... 296
  Extension: Reinforcing the Difference Between the Multiplicand and Multiplier ... 296

About the Multiplication Charts ................................................................. 297

Working with Multiplication Chart 3 ............................................................. 300
  Extension: Exploring the Commutative Property of Multiplication ............... 302

Working with Multiplication Chart 4 ............................................................. 303
  Extension: Finding Squared Numbers on Multiplication Chart 4 ................. 305
  Extension: Solving Other Equations with One Hand ................................... 305

Working with Multiplication Chart 5 ............................................................. 306
  Extension: Finding the Product for Every Square ....................................... 308
  Extension: Recording Products on Multiplication Chart 5 .......................... 308
  Extension: Finding Combinations on Multiplication Chart 5 ...................... 308
  Extension: Playing Games with the Multiplication Charts ......................... 308

About the Unit Division Board ................................................................. 309

Working with the Unit Division Board ......................................................... 311
  Extension: Completing a Division Tables Booklet ...................................... 313
  Extension: Working with Remainders on the Unit Division Board ................. 313
  Extension: Recording the Division Facts .................................................. 314

About the Division Charts ................................................................. 315

Working with Division Chart 1 ................................................................. 317

Working with Division Chart 2 ................................................................. 319
  Extension: Recording Quotients on Division Chart 2 .................................. 321
  Extension: Finding Combinations on Division Chart 2 .............................. 321
  Extension: Playing Games with the Division Charts ................................. 321
