

TABLE OF CONTENTS

HOW THIS MANUAL CAN BE USED	1
BOTANY	5
Introduction	5
Plant Review	6
Background Information	6
Activity 1: Reviewing Plant Characteristics	11
Activity 2: Reviewing the Parts of Flowers and Trees	13
Classification	15
Background Information	15
Activity 1: Understanding How Plants Are Grouped	23
Activity 2: Identifying the Distinguishing Features of the Main Plant Groups	25
Activity 3: Grouping or Classifying Plants	27
Activity 4: Looking at the Traditional Plant Classification Chart	29
Roots	31
Background Information	31
Experiment 1: Demonstrating That Roots Absorb and Transport Moisture	34
Activity 1: Examining Root Systems and Functions	36
Activity 2: Investigating Modified Roots	38
Stems	40
Background Information	40
Activity 1: Reviewing Types of Stems and Their External Structure	45
Experiment 1: Demonstrating the Role of Stems in Transporting Substances	47
Activity 2: Exploring the Vascular Structure of Stems	49
Activity 3: Determining the Age and Life Experience of a Tree	51

Leaves	53
Background Information	53
Experiment 1: Investigating the Role of Leaves in Transpiration	59
Experiment 2: Demonstrating That Photosynthesis Produces Oxygen	61
Experiment 3: Demonstrating That Plants Produce Food During Photosynthesis	64
Activity 1: Examining Leaf Structure and Reviewing Leaf Terminology	67
Flowers	69
Background Information	69
Activity 1: Investigating Flower Structure	75
Activity 2: Exploring Pollination	77
Fruits and Seeds	79
Background Information	79
Activity 1: Examining Fruits	84
Activity 2: Distinguishing Fleshy and Dry Fruits	86
Activity 3: Dissecting a Seed	88
Identification	90
Background Information	90
Activity 1: Identifying Common Garden Flowers	94
Activity 2: Identifying Common Shrubs and Trees	96
Activity 3: Using a Field Guide to Identify Unfamiliar Plants	98
Basic Needs of Plants	100
Background Information	100
Experiment 1: Demonstrating That Seeds Need Water and Warmth to Germinate	106
Experiment 2: Demonstrating That Plants Grow in Predictable Patterns	109
Experiment 3: Demonstrating That Plants Need Nutrients, Water, and Air	112
Activity 1: Exploring Plant Adaptations	116
Humans and Plants	118
Background Information	118
How Humans Use Plants for Food and Medicine	118
Experiment 1: Demonstrating That Garlic Has Anti-Microbial Properties	123
Activity 1: Exploring How Humans Use Plants for Food	126

How Humans Care for Plants	128
Activity 1: Showing That Indoor Plants Can Be Propagated Vegetatively	136
Activity 2: Growing a Crop of Vegetables	138
MICROSCOPIC STUDY	142
Introduction	142
Cells	143
Background Information	143
Activity 1: Magnifying Objects and Investigating Cell Structure	148
Activity 2: Discovering Cells Under a Microscope	150
Activity 3: Reviewing Plant and Animal Cell Structure	152
Activity 4: Solving a Cell Crossword Puzzle	155
Microorganisms and Food Spoilage	156
Background Information	156
Experiment 1: Understanding Food Spoilage	161
Activity 1: Preserving Foods	164
RESOURCES	166
