

TABLE OF CONTENTS

HOW THIS MANUAL CAN BE USED	1
MATTER	4
Introduction	4
Atoms	5
Background Information	5
Activity 1: Exploring Atomic Structure	9
Activity 2: Demonstrating That Atoms Are the Basic Units of Matter	11
Activity 3: Drawing Atomic Structures	12
Molecules	14
Background Information	14
Activity 1: Witnessing Molecules in Motion	16
Chemical Elements	18
Background Information	18
Activity 1: Researching Some Common Elements	20
Activity 2: Becoming Familiar with Chemical Symbols	22
The States of Matter	24
Background Information	24
Activity 1: Acting Out Energy Levels of Molecules	27
Activity 2: Exploring the Basic Physical Properties of Solids	29
Activity 3: Exploring the Basic Physical Properties of Liquids	31
Activity 4: Exploring the Basic Physical Properties of Gases	33
Activity 5: Investigating Plasma	35
Experiment 1: Weighing Air	37
Activity 6: Measuring the Volume of an Irregular Solid	38
Water Pressure and Air Pressure	40
Background Information	40
Activity 1: Demonstrating That Water Pressure Increases with Depth	42
Activity 2: Seeing the Effects of Air Pressure	44
Activity 3: Using Water Pressure to Move Objects	46
Activity 4: Using Air Pressure to Move Objects	48

Changes in Matter	49
Background Information	49
Activity 1: Investigating Physical Change in Solids and Liquids	51
Activity 2: Investigating Physical Change in a Gas	53
Activity 3: Causing a Chemical Change	54
Combinations of Matter	56
Background Information	56
Activity 1: Creating a Mixture	59
Activity 2: Investigating How Elements Combine to Make Compounds . . .	61
Activity 3: Recognizing Chemical Formulas	63
Activity 4: Researching Familiar Elements and Compounds	65
Acids and Bases	67
Background Information	67
Activity 1: Investigating Acids and Bases	68
Density	70
Background Information	70
Activity 1: Testing Density in Water	72
Fire and Combustion	74
Background Information	74
Activity 1: Investigating What Is Needed for Combustion	75
ENERGY	78
Introduction	78
Energy Sources	78
Background Information	78
Activity 1: Transforming Energy	84
Activity 2: Investigating How Fossil Fuels Form	87
Activity 3: Exploring How Electricity Is Generated at Power Plants	89
Activity 4: Conserving Energy and Natural Resources	93
Sound	95
Background Information	95
Activity 1: Demonstrating That Sound Travels Through Air	98
Activity 2: Demonstrating That Sound Travels Through Solids	101
Activity 3: Demonstrating That Sound Travels Through Water	103

Light	105
Background Information	105
Activity 1: Discovering That Light Travels in a Straight Line	108
Activity 2: Investigating Opaque, Translucent, and Transparent Objects	110
Activity 3: Measuring Absorbed Light	111
Activity 4: Investigating Reflected Light	114
Activity 5: Exploring How Mirrors Reverse Images	117
Activity 6: Exploring the Refraction of Light	120
Electricity and Magnetism	122
Background Information	122
Activity 1: Exploring How Magnets and Batteries Work	130
Activity 2: Building an Electric Circuit	132
Activity 3: Investigating Electric Current	134
Activity 4: Exploring Electromagnetic Fields	137
Activity 5: Building an Electromagnet	139
Activity 6: Making a Model of How Electrical Energy Is Transmitted and Distributed	141
Activity 7: Investigating the Electromagnetic Spectrum	143
Gravity, Friction, and Inertia	146
Background Information	146
Activity 1: Measuring the Mass and Weight of an Object	151
Activity 2: Investigating Inertia and Momentum	154
Activity 3: Using Gravity and Friction to Make Objects Stop	157
Activity 4: Investigating Actions and Reactions	160
Activity 5: Exploring Causes of a Change in Motion	162
Activity 6: Investigating Relative Motion	165
RESOURCES	168
