

TABLE OF CONTENTS

HOW THIS MANUAL CAN BE USED	1
THE IMPORTANCE OF COSMIC EDUCATION AND THE FIVE GREAT LESSONS	6
INTRODUCTION	9
BOTANY	10
Introduction	10
Plant Review	11
Background Information	11
Activity 1: Reviewing Plant Characteristics	21
Activity 2: Reviewing the Parts of Flowers and Trees	23
Classification	25
Background Information	25
Activity 1: Understanding How Plants Are Grouped	42
Activity 2: Identifying the Distinguishing Features of the Main Plant Groups	45
Activity 3: Grouping or Classifying Plants	47
Activity 4: Looking at the Traditional Plant Classification Chart	50
Roots	53
Background Information	53
Experiment 1: Demonstrating that Roots Absorb and Transport Moisture	63
Activity 1: Examining Root Systems and Functions	65
Activity 2: Investigating Modified Roots	67
Stems	70
Background Information	70
Activity 1: Reviewing Types of Stems and Their External Structure	79
Experiment 1: Demonstrating the Role of Stems in Transporting Substances	81
Activity 2: Exploring the Vascular Structure of Stems	83
Activity 3: Determining the Age and Life Experience of a Tree	85

Leaves	87
Background Information	87
Experiment 1: Investigating the Role of Leaves in Transpiration	97
Experiment 2: Demonstrating that Photosynthesis Produces Oxygen	100
Experiment 3: Demonstrating that Plants Produce Food During Photosynthesis	103
Activity 1: Examining Leaf Structure and Reviewing Leaf Terminology	107
Flowers	109
Background Information	109
Activity 1: Investigating Flower Structure	119
Activity 2: Exploring Pollination	121
Fruits and Seeds	123
Background Information	123
Activity 1: Examining Fruits	134
Activity 2: Distinguishing Fleshy and Dry Fruits	136
Activity 3: Dissecting a Seed	138
Identification	140
Background Information	140
Activity 1: Identifying Common Garden Flowers	145
Activity 2: Identifying Common Shrubs and Trees	147
Activity 3: Using a Field Guide to Identify Unfamiliar Plants	149
Basic Needs of Plants	151
Background Information	151
Experiment 1: Demonstrating that Seeds Need Water and Warmth to Germinate	163
Experiment 2: Demonstrating that Plants Grow in Predictable Patterns	166
Experiment 3: Demonstrating That Plants Need Nutrients, Water, and Air	169
Activity 1: Exploring Plant Adaptations	173
Humans and Plants	175
Background Information	175
How Humans Use Plants for Food and Medicine	175
Experiment 1: Demonstrating that Garlic Has Anti-Microbial Properties	184
Activity 1: Exploring How Humans Use Plants for Food	188

How Humans Care for Plants	190
Activity 1: Showing that Indoor Plants Can Be Propagated Vegetatively	199
Activity 2: Growing a Crop of Vegetables	202
MICROSCOPIC STUDY	206
Introduction	206
Cells	207
Background Information	207
Activity 1: Magnifying Objects and Investigating Cell Structure	214
Activity 2: Discovering Cells Under a Microscope	217
Activity 3: Reviewing Plant and Animal Cell Structure	219
Activity 4: Solving a Cell Crossword Puzzle	222
Microorganisms and Food Spoilage	223
Background Information	223
Experiment 1: Understanding Food Spoilage	232
Activity 1: Preserving Foods	235
RESOURCES FOR TEACHERS AND STUDENTS	238
Print	238
Web	243
TEMPLATES FOR TEACHERS	253
Self-testing Review Sheet	254
Worksheet: Traditional Linnaean Classification	255
Experiment Template	256
Worksheet: Plant Identification	258
Activity: Observations of Seed Germination and Seedling Growth	260
Activity: Solving a Cell Crossword Puzzle	261
GLOSSARY	264
