

TABLE OF CONTENTS

HOW THIS MANUAL CAN BE USED	1
THE IMPORTANCE OF COSMIC EDUCATION AND THE FIVE GREAT LESSONS	4
INTRODUCTION	7
SCIENTIFIC METHOD	10
Introduction	10
Scientific Tools	12
Background Information	12
Activity 1: Getting to Know the Compound Microscope	20
Activity 2: Using a Compound Microscope	22
Activity 3: Preparing a Dry Mount Slide and a Drawing From Microscopic Observation	25
Activity 4: Weighing Objects With a Triple-Beam Balance	28
Scientific Techniques	31
Background Information	31
Activity 1: Classifying Objects According to Their Origins	34
Activity 2: Gathering Data About an Object by Using the Senses	36
Activity 3: Gathering a Set of Data About People	38
Activity 4: Drawing to Scale	40
Science Experiments	44
Background Information	44
Activity 1: Designing and Carrying Out a Simple Science Experiment ...	48
Activity 2: Using a Control in an Experiment	51
TECHNOLOGY	54
Introduction	54

Simple Machines	55
Background Information	55
Activity 1: Pulling a Load Up a Ramp	62
Activity 2: Cutting Through Cardboard With a Wedge	65
Activity 3: Discovering That a Screw is a Type of Ramp	67
Activity 4: Lifting an Object With a Lever	70
Activity 5: Lifting a Load With a Wheel and Axle	72
Activity 6: Lifting a Brick With a Pulley	75
Technologies to Meet Basic Needs	78
Background Information	78
Activity 1: Making Primitive Cutting Tools From Stone and Bone	86
Activity 2: Starting a Fire With a Bow Drill	88
Activity 3: Molding and Firing Bricks	90
Activity 4: Making and Firing Clay Pots	92
Engineering Technologies	94
Background Information	94
Activity 1: Building a Model Roman Arch	101
Activity 2: Building a Model Water Wheel	103
Activity 3: Building a Model Windmill	105
TECHNOLOGY RESEARCH PROJECTS FOR OLDER STUDENTS	107
Introduction	107
How to Choose Technology Topics and do Research	108
Background Information	108
Activity 1: Choosing a Research Topic	117
Activity 2: Doing Research	119
Animal Power and Steam Power	121
Background Information	121
Research Area 1: Human Uses of Animal Power	122
Research Area 2: The Steam Engine and Its History	123
The Automobile and the Internal Combustion Engine	123
Background Information	123
Research Area 1: The Development of the Automobile	125
Research Area 2: How Internal Combustion Engines Work	125
The Electric Motor	125
Background Information	126
Research Area 1: The Invention and Uses of the Electric Motor	126
Research Area 2: The Development of Electric Automobiles	127

Lighting and the Electric Light Bulb	127
Background Information	127
Research Area 1: Lighting Before Electricity	128
Research Area 2: The Invention of the Electric Light	128
Research Area 3: The Principles Behind the Electric Light	128
Radio and Television	129
Background Information	129
Research Area 1: The Principles Behind Radio and Television	131
Research Area 2: The History of Radio and Television	131
Research Area 3: The Radio or Television Studio	131
The Computer and the Microchip	132
Background Information	132
Research Area 1: How Microchips and Computers Work	133
Research Area 2: The History of the Computer	133
Research Area 3: The Computer in Modern Life	134
The Airplane	134
Background Information	134
Research Area 1: The Principles of Flight	135
Research Area 2: The History of the Airplane	135
Lasers and Microwaves	136
Background Information	136
Research Area 1: The Laser and How it is Used	137
Research Area 2: The Microwave Oven	137
 RESOURCES FOR TEACHERS AND STUDENTS	 138
Print	138
Web	143
 TEMPLATES FOR TEACHERS	 149
Steps of the Scientific Method	149
Science Experiment Template	150
 GLOSSARY	 152
