

TABLE OF CONTENTS

HOW THIS MANUAL CAN BE USED	1
MATTER	5
Introduction	5
Atoms	6
Background Information	6
Activity 1: Exploring Atomic Structure	10
Activity 2: Demonstrating That Atoms Are the Basic Units of Matter	12
Activity 3: Drawing Atomic Structures	14
Molecules	16
Background Information	16
Activity 1: Witnessing Molecules in Motion	18
Chemical Elements	21
Background Information	21
Activity 1: Researching Some Common Elements	24
Activity 2: Becoming Familiar with Chemical Symbols	26
The States of Matter	28
Background Information	28
Activity 1: Acting Out Energy Levels of Molecules	33
Activity 2: Exploring the Basic Physical Properties of Solids	35
Activity 3: Exploring the Basic Physical Properties of Liquids	38
Activity 4: Exploring the Basic Physical Properties of Gases	41
Activity 5: Investigating Plasma	44
Experiment 1: Weighing Air	46
Activity 6: Measuring the Volume of an Irregular Solid	48
Water Pressure and Air Pressure	50
Background Information	50
Activity 1: Demonstrating That Water Pressure Increases with Depth	53
Activity 2: Seeing the Effects of Air Pressure	55
Activity 3: Using Water Pressure to Move Objects	57
Activity 4: Using Air Pressure to Move Objects	59
Changes in Matter	61
Background Information	61
Activity 1: Investigating Physical Change in Solids and Liquids	63
Activity 2: Investigating Physical Change in a Gas	66
Activity 3: Causing a Chemical Change	68

Combinations of Matter	.71
Background Information	.71
Activity 1: Creating a Mixture	.74
Activity 2: Investigating How Elements Combine to Make Compounds	.77
Activity 3: Recognizing Chemical Formulas	.80
Activity 4: Researching Familiar Elements and Compounds	.82
Acids and Bases	.85
Background Information	.85
Activity 1: Investigating Acids and Bases	.87
Density	.90
Background Information	.90
Activity 1: Testing Density in Water	.92
Fire and Combustion	.95
Background Information	.95
Activity 1: Investigating What Is Needed for Combustion	.97
ENERGY	.100
Introduction	.100
Energy Sources	.100
Background Information	.100
Activity 1: Transforming Energy	.108
Activity 2: Investigating How Fossil Fuels Form	.112
Activity 3: Exploring How Electricity is Generated at Power Plants	.114
Activity 4: Conserving Energy and Natural Resources	.118
Sound	.121
Background Information	.121
Activity 1: Demonstrating That Sound Travels Through Air	.125
Activity 2: Demonstrating That Sound Travels Through Solids	.129
Activity 3: Demonstrating That Sound Travels Through Water	.131
Light	.133
Background Information	.133
Activity 1: Discovering That Light Travels in a Straight Line	.137
Activity 2: Investigating Opaque, Translucent, and Transparent Objects	.140
Activity 3: Measuring Absorbed Light	.142
Activity 4: Investigating Reflected Light	.145
Activity 5: Exploring How Mirrors Reverse Images	.149
Activity 6: Exploring the Refraction of Light	.152

Electricity and Magnetism	155
Background Information	155
Activity 1: Exploring How Magnets and Batteries Work	165
Activity 2: Building an Electric Circuit	168
Activity 3: Investigating Electric Current	170
Activity 4: Exploring Electromagnetic Fields	174
Activity 5: Building an Electromagnet	177
Activity 6: Making a Model of How Electrical Energy Is Transmitted and Distributed	179
Activity 7: Investigating the Electromagnetic Spectrum	182
Gravity, Friction, and Inertia	185
Background Information	185
Activity 1: Measuring the Mass and Weight of an Object	191
Activity 2: Investigating Inertia and Momentum	196
Activity 3: Using Gravity and Friction to Make Objects Stop	201
Activity 4: Investigating Actions and Reactions	205
Activity 5: Exploring Causes of a Change in Motion	207
Activity 6: Investigating Relative Motion	210
RESOURCES FOR TEACHERS AND STUDENTS	214
